SlackFirst Golden Demo

Wrap-Up & Learnings — Dreamforce 2026 Vision

Salesforce Slack Design & Cross-Cloud Teams

Sales Cloud · Marketing Cloud · Service Cloud · AgentForce · Agentic OS

What Is the Golden Demo?

ORIGIN

Requested directly by **Marc Benioff** after seeing three separate SlackFirst demos at the Hawaii offsite. He wanted a single unified vision projecting **12–18 months ahead** to Dreamforce 2026.

THE VISION

Slack as the Agentic OS for the enterprise — AgentForce, Slack, and third-party agents connected in a single cross-cloud story, all rooted in user research.

Safe harbor: This is an exploratory prototype. Nothing featured is on the product roadmap (yet) or representative of final UI.

Today's Agenda

Part 1 · By Cloud

- SlackFirst Sales
- SlackFirst Marketing
- SlackFirst Service

Part 2 · Capabilities

- Platform primitives
- Agentic OS big rocks

Part 3 · Process

- Research & learnings
- What's next

SlackFirst Sales

Follow an Account Executive working a deal to close — using AI to automate updates, gather quotes, get approvals, and turn meetings into action.

KEY CAPABILITIES

- Slack Voice Mode for seamless communication
- Rich agent interactions & recommendations
- Ambient Intelligence + meeting recaps
- Approvals with AI context
- Tableau metrics integration

CORE INSIGHT

"Speed is everything for sellers. The more we smartly automate — updating Salesforce, gathering quotes, getting approvals — the more they can focus on **closing**."

What Sellers Actually Need

"One of my biggest gripes is updating Salesforce hygiene. In a perfect world: **'Push all opportunities with close dates in the next 7 days out by two weeks.'** That would be the biggest use case."

"Can it create the opportunity Slack channel and pull the meeting together? **Otherwise it's 20 min of finding time on people's calendars.**"

"A meeting can have 10–12 different tasks... **it doesn't trigger actions or next steps.** [This AI solution] would make the process more agile for the whole team."

SlackFirst Marketing

Follow a marketing manager through campaign brief creation and launch — eliminating scattered knowledge, misaligned stakeholders, and siloed data.

KEY CAPABILITIES

- Agentic Deep Research for market insights
- Agentic Campaign Creation with AI
- Integrated Analytics in Slack workflows
- Seamless Handoff to Salesforce
- Multi-player Agent Experience

CORE INSIGHT

"Updating all the different documents, spreadsheets, trackers — everybody has to review that, and then there are **500 variations**. It's just a lot of tactical work."

What Marketers Actually Need

"The things that take up the most time are **creating the brief and getting approvals.**"

"If there's a way that it's not just a screenshot — and there was an easy way to **prompt Slack to go pull something from Tableau and put it in the chat** so we could both reference it, that'd be cool."

"I want to see how many customers received a specific campaign... **it's hard to keep track and I wish the data was more self-serve.**"

SlackFirst Service

Follow a Service Rep through a customer call — starting a swarm, finding experts, and resolving a case while supervisors monitor quality in real time.

KEY CAPABILITIES

- Ask Anything for instant information access
- Ambient Intelligence during customer calls
- In-swarm Expert Finder
- Service Supervisor workflow integration
- Agentic knowledge updates

CORE INSIGHT

"There's a lot of noise in escalation channels. Just summarizing — **'here were 3 incidents, here's what you need to know'** — while cutting out all the back and forth."

What Service Teams Actually Need

"If during a call, AI is able to pull from a knowledge base... someone's asking about shipping time frames and **it's just not on the top of your head**. It would be nice to have something pull that in."

"That's always a struggle — making sure things are moving along and that someone **didn't miss something, or that a lot of attention is being given to something low-priority**."

"'Why did this number drop?' — **Getting that answer quickly is usually very important**."

Platform Capabilities & Primitives

Native Slack capabilities woven throughout all three cloud vignettes

STARTING NOW

- **Today View** — Focused place to start your day
- **Task Management** — Central agent/task/to-do hub
- **Approvals** — Salesforce notifications & workflow
- **Email** — Downmarket composition
- **Meetings + Calendar** — Slack ↔ Salesforce sync
- **Rich Agentic Interactivity** — CRM updates & record creation

AGENTIC OS BIG ROCKS

- **Agent Orchestration** — Single interface for multiple AI agents
- **Ambient Intelligence** — Real-time listening, transcription, action items
- **Agent & AppExchange** — Marketplace for agents & workflows

Broad Research Themes & Learnings

Lean into SlackFirst advantages. Deep context, everything in one place, immediate action — these are Slack's native strengths.

Think holistically about use cases. Meetings are high-leverage: before, during, and after. Seamless end-to-end solves the 'work of work.'

Ambient AI felt novel. Make behavior configurable — show when AI is listening; allow hiding when screen-sharing with customers.

Build trust over time. Users are skeptical from prior AI experiences. Start with humans in the loop; give tools for feedback and configuration.

Noise & channel sprawl reduce Slack's value. Be thoughtful about when channels/notifications are created — smartly archive when appropriate.

What the Golden Demo Is (and Isn't)

What It Is ✓

- Forward-looking Figma prototype for Dreamforce 2026
- Conversational, agentic-first, AI-powered
- AgentForce + Slack + 3rd-party agents cross-cloud
- Slack as the Agentic OS — three distinct vignettes
- Rooted in real user research

What It's Not ✗

- Not a locked commitment or product roadmap
- Not replacing Solutions CoE Golden Demos
- Not focused on complex document creation
- Not just product walkthroughs

What's Next

SOCIALIZING WITH SALESFORCE

- Service Cloud integration for contact centers
- ITSM evolution within Slack
- Cloud-specific SlackFirst app vision consultations
- V2MOM development for joint SlackFirst FY27 program
